

HOTMELT ADHESIVE

## MAKATHERM HOTMELT EVA Granules & Cartridges

MAKATHERM edging adhesive is an EVA hotmelt recognised for its excellent adhesion properties, heat resistance, thermal stability & shelf life.

Universally used on edgbanders New Zealand wide where EVA granules & cartridges are specified.

MAKATHERM is suitable for the bonding of PVC/ABS & wood veneer with low adhesive spread & almost invisible joints.

### Features

- Variable running temps of 190°C - 210°C
- Use with PVC/ABS & wood veneer
- Quick pre-heat time
- Available in cartridges & granules
- Consistent application

For feed rates of 15 meters / per minute or less specify low speed Hotmelt by MAKATHERM.
