

TEKTON MULTIPLEX WOOD VENEER

SOLID | FLEXIBLE | CONTINUOUS

Tekton multiplex wood veneer edging is produced in Germany on coiled rolls of flexible multi-layered veneer leaf.

The incredibly durable construction with finger jointed middle layers ensures the highest possible flexibility for straight line & curved edgebanding.

Recommended for use with UV resistant lacquers.

Features

- Pre-sanded front face (180 grit)
- Pre-sanded back face (40 grit)
- Pre-primed with biding agent
- Custom sizing available on request

MDF & particle boards obtain a high end look when pairing with Tekton natural wood veneer.

Tekton Multiplex Beech (Left)

50m rolls, 22mm up to 60mm wide. 2mm thick.

Tekton Multiplex Birch (Right)

50m rolls, 22mm up to 65mm wide. 2mm thick.
