

# PROPAINT PVC

## Paintable PVC Edging

PROPAINT pre-primed PVC edging is designed to give a trouble free paintable surface.

The main technical feature is the homogeneous adhesive primer coating on the surface of the edging. PROPAINT accepts either solvent, oil or water based paints.

Recommended for use with no preparation e.g sanding or solvent cleaning which allows for savings in time and materials.

PROPAINT has been subjected to industry standard testing by MIROTONE, New Zealand's largest supplier of paint systems to the furniture and cabinetry trade.

Ideal for use with both oil & water based paints.

All edges have had a homogeneous primer coating applied to the front face.

PROPAINT is available preglued or unglued as flexible 1mm 120m & 60m rolls.

### Standard widths

22mm | 29mm | 35mm | 45mm | 65mm
