Prolaser Fusion Edging is co-extruded PP (Polypropylene) comprising a premium coating layer and a functional layer, supplied in 1.2mm thickness for exclusive use with Near Infrared (NIR), hot-air (Airtec), Hyfuse (HYS), Air-Force, or Laser edgbanding machines. All 1.2mm decors can be custom-slit upon request; please allow 1-2 days. Minimum orders of 10LM may apply. All goods are subject to availability. Standard 22mm carton sizes are 750LM. For more information and technical data, please visit our website at www.hutchco.co.nz or contact us using the online contact form. The Prolaser Timberland / Organic finish can be used with Puregrain & Wilderness.
